        cout << "Result = " << cos(a);  
        break;  
  
    case 9:  
        cin >> a;  
        cout << "Result = " << tan(a);  
        break;  
  
    default:  
        cout << "Invalid choice";  
}  
  
return 0;  
}
```

A terminal window titled "input" with a dark background and a blue vertical bar on the left. The window contains a menu for a "Scientific Calculator" with nine options: 1. Addition, 2. Subtraction, 3. Multiplication, 4. Division, 5. Power, 6. Square Root, 7. Sin, 8. Cos, and 9. Tan. The user has entered "addition", which is marked as an "Invalid choice". The program then displays a green message: "...Program finished with exit code 0" and "Press ENTER to exit console." with a cursor at the end.

```
input
===== Scientific Calculator =====
1. Addition
2. Subtraction
3. Multiplication
4. Division
5. Power
6. Square Root
7. Sin
8. Cos
9. Tan
Enter your choice: addition
Invalid choice

...Program finished with exit code 0
Press ENTER to exit console.
```
